BRAND BOOK

Ewa Jabłońska technical-writing.net

> The brand is dark first. This PDF uses the light mode so that it prints well. The HTML book shows the dark mode.

The rules for how the portfolio looks and sounds: on the site, on docs sites, on the CV and LinkedIn, and in Confluence.

> Ewa chose the direction, the logo concept and the type, and approved this edition on 12 November 2026. The files are checked but not yet applied to the live site.

1

Essence

Audience

A company that hires for AI-assisted documentation. A hiring manager or team lead who reads the page fast.

Positioning

For teams that build documentation with AI, Ewa Jabłońska is the technical writer who connects technology, product, and users. Docs stay in the centre. She sets the direction for AI work and checks the result.

Message pillars

- Docs stay in the centre.
- Technology, product, and users connect through the writer.
- The writer directs AI and checks the result.
- Proof, not claims: each skill links to a project.

Personality

The brand is	The brand is not
Clear	Cold
Structured	Bureaucratic
Curious about AI	Hyped
Human	Casual
In charge	Loud

> The positioning is an internal sentence. It is not site copy. Ewa writes the hero message and the other narrative texts (D19).

2

Voice

Plain, direct, and human. Short sentences. The reader's understanding comes first.

Who writes what (D19, "Mixed")

Text type	Examples	Who writes	AI's role
Narrative	Hero message, Concept, Process, blog intros, blog posts, case studies	Ewa	Proofreads only: typos, grammar, clarity. AI does not rewrite and does not add content.
Functional	Navigation, buttons, card descriptions, meta titles and descriptions, alt text, 404 page, cookie banner	AI drafts	Drafts in this voice. An independent AI review checks the draft.

Ewa approves every text before it goes live. Ewa can ask AI for a draft of a narrative text; the copy deck records the exception.

Lists use the Oxford comma: "technology, product, and users" (D20). Page titles: "{page} | Ewa Jabłońska".

Trait	In practice	Boundary
Clear	One idea per sentence. The same term for the same thing.	Speak to the reader as "you".
Structured	Headings say what the section does. Steps are in order.	No filler headings, no formal padding.
Curious about AI	Say what AI did, what Ewa did, and what Ewa checked.	No "revolution", no "supercharge".
Human	First person. Honest about what is in progress.	No emoji, no exclamation marks.

In charge	Active voice: Ewa sets, decides, reviews.	No superlatives about herself.

Examples from Ewa's published texts

"Your job is not to impress the reader. Your job is to make sure they understand."

Blog: If You Love Writing, Technical Writing Might Frustrate You

"Technical writing does not exist in isolation."

Home page, Concept section

Terms

Concept	Use	Avoid
The three areas	Technology, Product, Users	Tech, customers, audience
Ewa's role with AI	directs, reviews, checks	prompts, generates
Readers	people and AI	humans and LLMs
Project state	Finished, In progress	WIP, beta
Name	Ewa Jabłońska (with Polish letters)	Ewa Jablonska

Full guide: tone-of-voice.md. Tagline and hero line: not in scope; Ewa writes them.

Logo

Three arcs with nodes. Each arc starts at a node and stops before the next node. Nothing in the centre.

Default: on dark background

On light background (darker colour set)

Variants

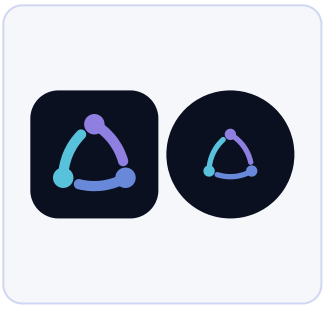

One colour, white

One colour, ink

Small variant, 24 and 16 px

Favicon and round avatar

Lockup

Rules

Rule	Value
Minimum size	Standard mark: 32 px. From 16 to 31 px use the small variant. Print: 8 mm (proposed, not tested on paper).

Clear space	One node diameter on each side.
Colour order	Top node and right arc: Product. Right node and bottom arc: Technology. Left node and left arc: Users.
Backgrounds	Brand dark, brand surface, brand light, white. On other colours use one colour.
Lockup	Mark 56 for text 36. Gap: a quarter of the mark width. Inter 600.

Misuse

Rules

- An area colour says "this belongs to this area". A project between two areas shows both colours.
- Always put a text label next to the colour.
- Status is neutral: "Finished" is a filled pill, "In progress" is an outline pill.
- On light, the Users colour `#2F8FA6` is 3.50:1. Use it for shapes. For small text use `#25707F`.

Ratios are calculated against the mode background. Calculated contrast is not an accessibility audit. Full table: palette.md. Tokens: tokens.css.

Typography

One family: Inter. Open licence (SIL OFL 1.1). Weights 400, 500 and 600.

TECHNICAL WRITING PORTFOLIO

Ewa Jabłońska

Section heading, 24 px, weight 600

Card title, 20 px, weight 600

Body text, 16 px, weight 400, line height 1.6. A line has 68 characters at most. Polish letters: ą ć ę ł ń ó ś ź ż Ą Ć Ę Ł Ń Ó Ś Ź Ż. Digits: 0123456789.

Small text, 14 px, for card text and captions.

Role	Size	Weight	Notes
H1	32–48 px	600	Tracking −0.01em
H2	24 px	600	A thin rule follows it on the site
H3	20 px	600	Card titles
Body / lead	16 / 18 px	400	Line height 1.6
Label	12 px	600	Upper case, tracking 0.12em, 4 words at most
Code	0.9em	400	System monospace. Only for code, never for labels.

- Sentence case. Left-aligned. No gradient text. No italics; use weight 600 for emphasis.
- Print (CV): body 10 pt, small 8.5 pt, H1 24 pt.

Details and licence: typography.md, fonts/OFL.txt.

Graphic system: Junction

The writer stands where technology, product, and users meet. The brand shows the meeting points: a node marks a point, a line joins points.

Area label

- Technology
- Product
- Users

One node and the area name.

Between two areas

- Technology + Product
- Product + Users
- Technology + Users

Two nodes that overlap.

Status and tags

FINISHED

IN PROGRESS

Status is neutral. It does not use area colours.

Project card

Technology + Product

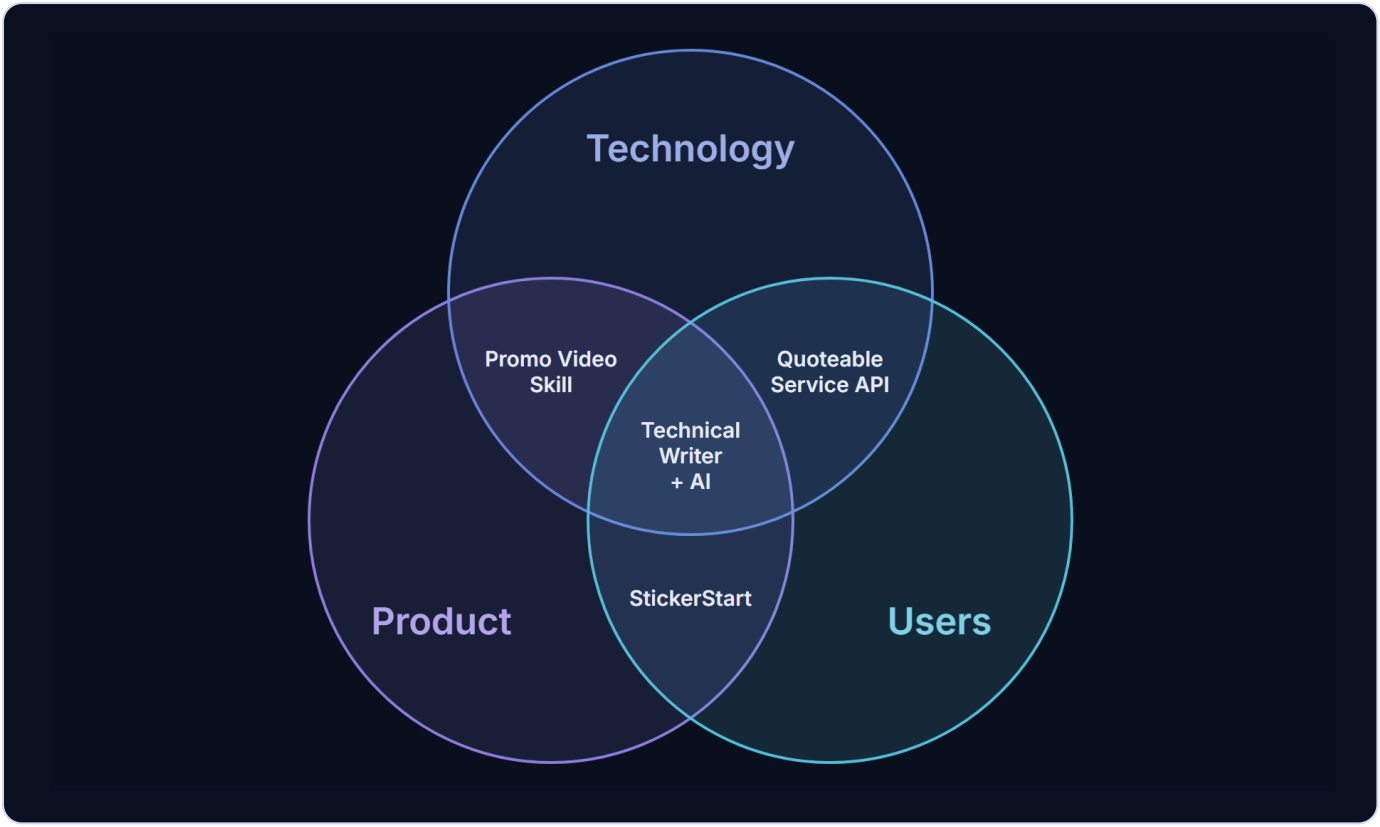

Promo Video Skill

Documentation for an AI skill, written so that both the people who use it and the model that runs it can understand what it does, when to use it, and where its limits are.

IN PROGRESS

- Surface colour, 1 px line, radius 10 px.
- A 3 px junction line on the left edge, from the first area colour to the second.
- No shadow, no glow, no glass effect.
- The card text is the current site text.

The diagram

Three outlined circles with a light fill. The project name sits inside the area where its two circles meet. The centre says "Technical Writer + AI". No dots and no lines in the diagram: the skill words ("docs for people and AI") are on the project cards. A light version exists for Confluence and print.

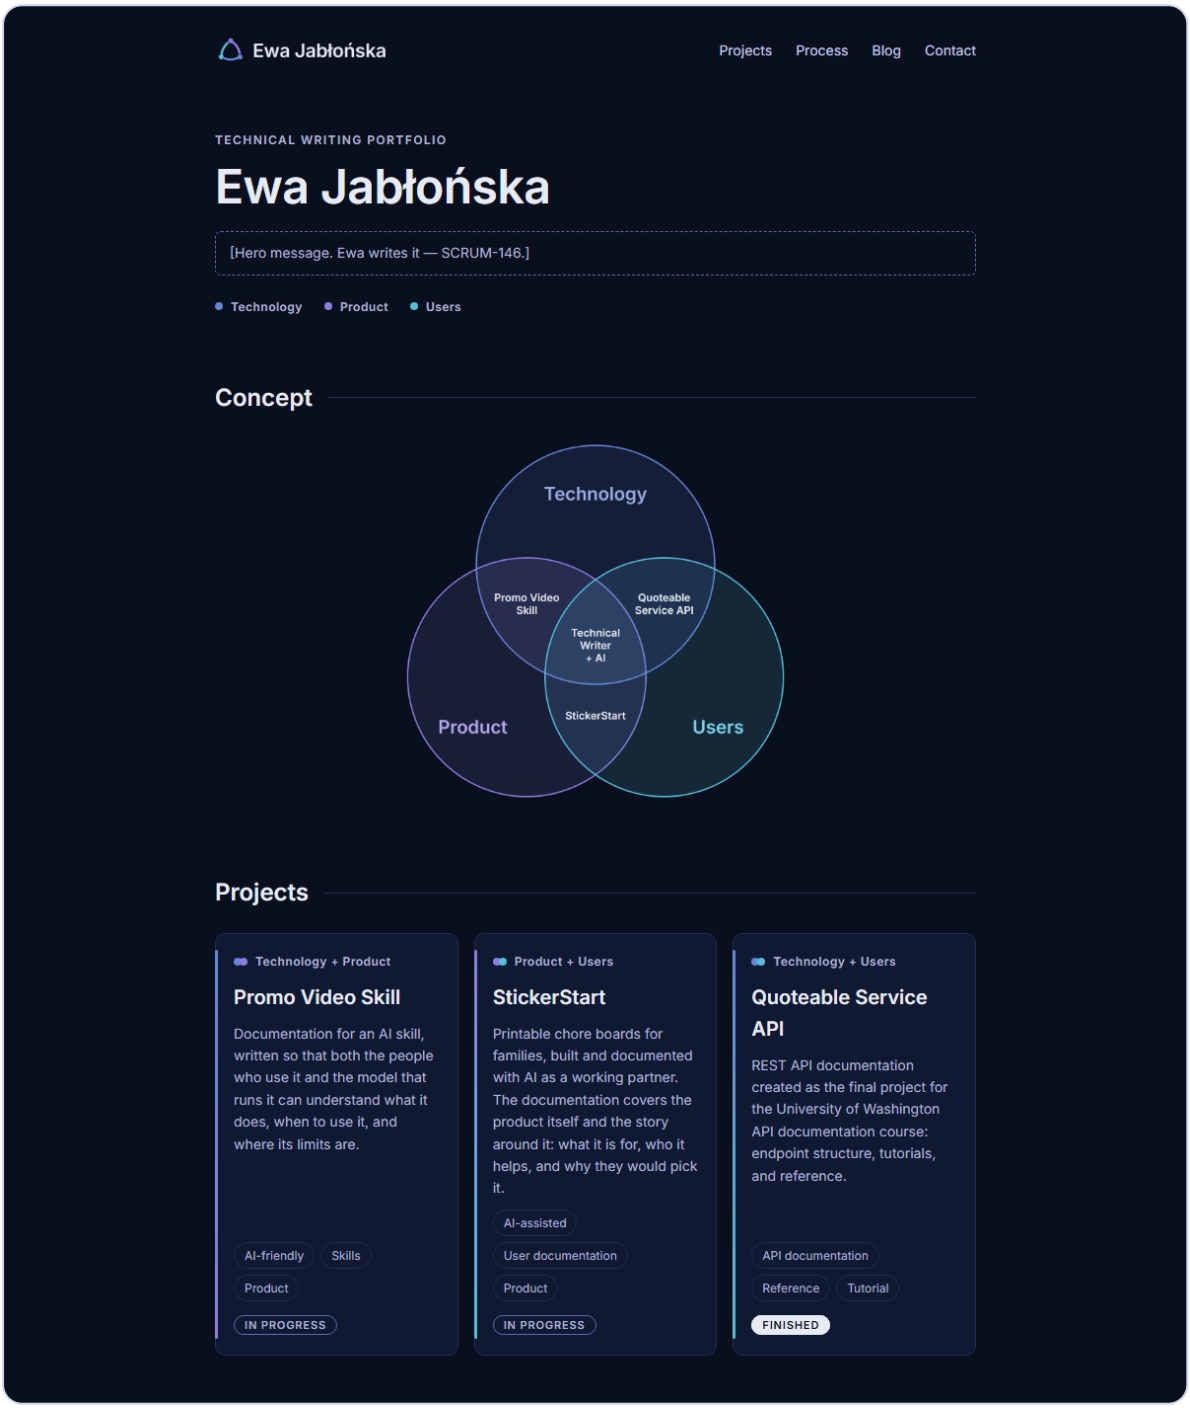

Details: graphic-system.md.

DECISION RECORD

Direction change

[Page text. Ewa writes it — SCRUM-153.]

Editable source: applications/index.html.

Files and status

Item	File	Status	Decision
Positioning	brief.md	working	Confirmed by Ewa
Voice guide	tone-of-voice.md	working	Describes Ewa's voice; not reviewed by Ewa yet
Creative direction	explorations/2026-11-12-directions/	concept, selected	A · Junction, approved by Ewa
Mark	logo/source, logo/exports	production	logo-01/A, approved final
Lockup	logo/exports/lockup-*.png	working	Routine; lettering is not outlined
Palette and tokens	tokens.css, palette.md	production	Approved with the book
Typography	typography.md, fonts/	production	Inter only, chosen by Ewa
Diagram	graphic/venn-*.svg, .png	working	Content from SCRUM-147; text size on a phone open
Applications	applications/	mockup	Not built on the live site

What is live

The live site still shows the old identity (commit 60b8994): the raster logo with the briefcase, the old Venn diagram and the old colours. Nothing in this book is applied yet. The plan for the change is in rebranding-plan.md.

Not verified

- No print test on paper.
- No search for similar logos. This book is not legal clearance.
- No market research: the category notes in the brief are assumptions.
- Contrast is calculated. It is not an accessibility audit.
